\$30 Non - Member

Sponsorships available at \$75 and \$150. Please contact Sean Colorado at [scolorado@leightongroup.com](mailto:scolorado@leightongroup.com) if you are interested in being a sponsor.

**Topic** **Complete Streets**

Complete Streets is a national movement to ensure transportation planners and engineers consistently design and operate the entire right of way with all users in mind—including motorists, bicyclists, public transportation users, and pedestrians of all ages and abilities. In California it's not just a movement, but a requirement by law. Complete Streets provide communities with options to get out of their cars, cleaning our air, encouraging physical activity, and providing a more efficient and adaptable transportation system. Complete Streets need to be planned and implemented with the support of elected officials and community and agency involvement. LLG has been a fixture in the transportation planning/traffic engineering profession in Southern California for over 40 years and in partnership with the National Complete Street Coalition, encourage you to embrace the idea that complete streets are for everyone, whether they travel by car, bike, foot, or public transportation.

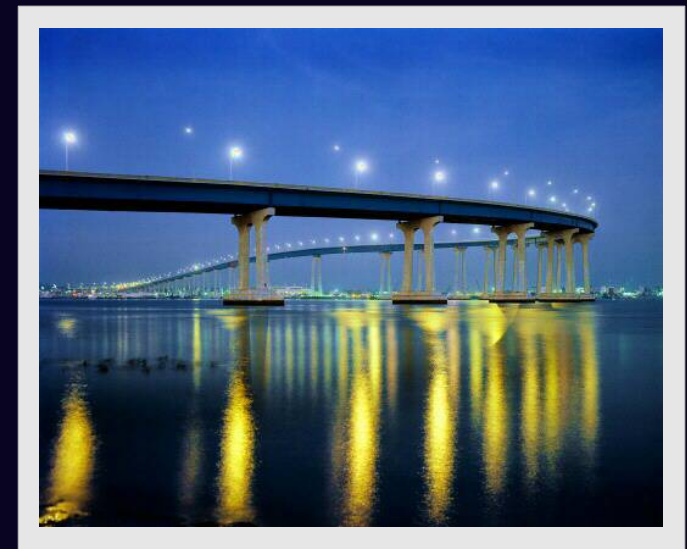

**Speakers**

**John Boarman**

John Boarman's professional expertise is in traffic engineering and transportation planning and parking. He holds a Master's of Science Degree in Civil Engineering from Purdue University and has over 20 years of professional experience. He is a registered Civil Engineer and a registered Traffic Engineer in the State of California. John has prepared transportation planning studies for several high profile projects, including the North Embarcadero Redevelopment Master Plan, the UCSD Long-Range Development Plan, the Children's Hospital Acute Care Pavilion, and the El Cajon Downtown Specific Plan.

**KC Yellapu**

KC Yellapu is a certified *Civil & Traffic Engineer in State of California* and a certified Professional Traffic Operations Engineer. He holds a Masters Degree in Civil Engineering with focus in Transportation Engineering from University of Alabama and has more than nine (9) years of experience in the Transportation Engineering/Planning field. His professional experience involves the completion of a broad range of Transportation Planning projects. He is the Complete Streets team leader for Linscott Law and Greenspan Engineers. His work includes Complete Streets Assessments, Transit, Bicycle and Pedestrian analysis, Mobility Element preparations, Traffic Impact Studies, traffic modeling and simulation, pedestrian control plans, site access and circulation review and traffic calming studies.

**Mission Statement**

To foster the timely, orderly, and efficient development of all planned transportation facilities in the San Diego region and to promote appropriate means to finance and maintain these facilities.
